SUMMARY

Motivated third-year Diploma student in Artificial Intelligence and Machine Learning, driven by a genuine passion for Software Development and AI innovation. Proficient in Python, SQL, MySQL, Git, and GitHub, with practical experience building AI-driven and full-stack applications. Seeking an internship to gain real-world industry exposure, sharpen technical expertise, and contribute meaningfully to impactful projects.

SKILLS

Languages: Python, SQL, Java (Basic)

Technologies: Git, GitHub, MySQL, MySQL Workbench, VS Code

Libraries & Tools: NumPy, Pandas, Matplotlib (Learning)

Soft Skills: Analytical, adaptable, communicative, strategic, collaborative, quick learner.

PROJECTS

Inventory Management System | *Python, Flask, Firebase, HTML, CSS, JavaScript, Bootstrap*

Developed a full-stack web application to manage inventory, sales, customers, and business reports with real-time cloud data storage using Firebase Firestore.

- Built secure user authentication with role-based access (Admin, Staff, Guest).
- Implemented product, customer, and sales management with full CRUD operations.
- Integrated Firebase Firestore for real-time cloud database storage.
- Developed an interactive dashboard with KPIs and charts using Chart.js.
- Added inventory analytics, low-stock alerts, and business insights.
- Generated Excel reports for sales and inventory data using OpenPyXL.
- Designed a responsive, professional UI with Bootstrap 5, HTML, CSS, and JavaScript.
- Implemented session management, form validation, and error handling.
- Deployed the application on Vercel for live public access.

EDUCATION

Diploma in Artificial Intelligence & Machine Learning

Nawab Shah Alam Khan College of Engineering and Technology

Expected Graduation: 2027

Secondary School Certificate (SSC)

St. Paul's High School, Hyderguda
